Report Analysis for LinkedIn Top Skills Trends:
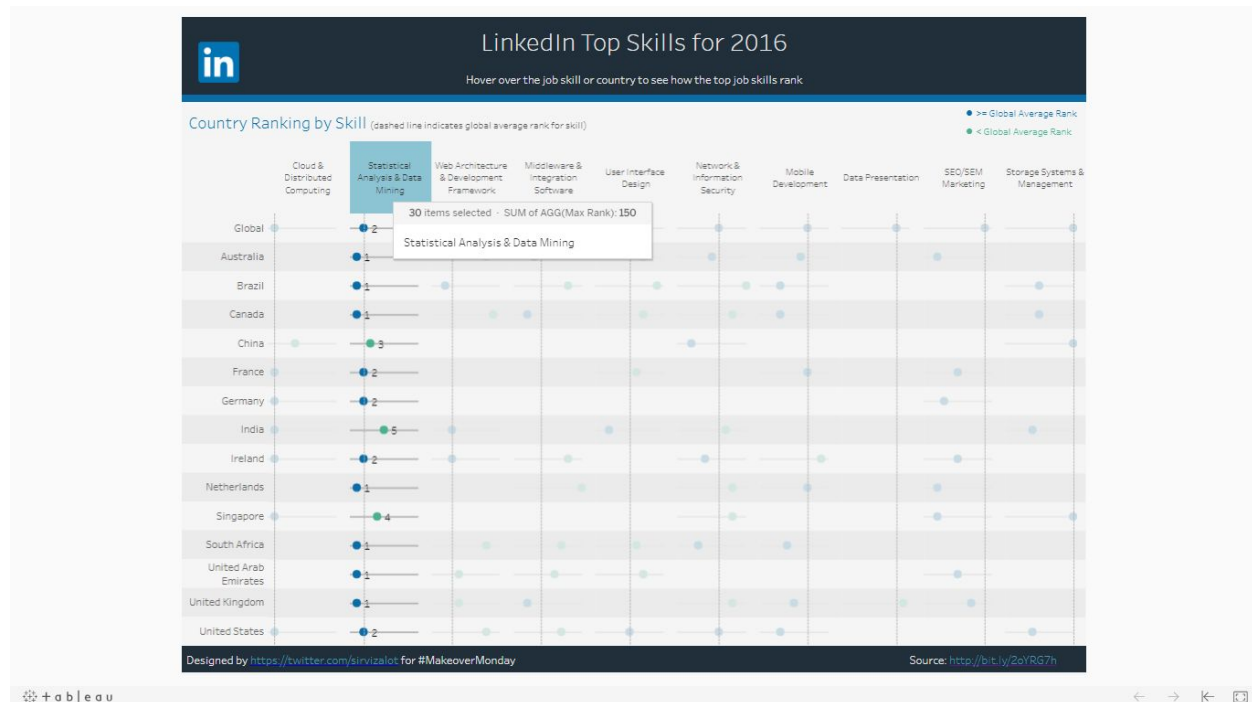

According to the first image when we analyze the top skills of year 2016,it can be seen that globally storage system and management is mostly demanded due to increase in data with evolution in emerging technologies it have been in great demand due to increase in storage systems.

If we take only the data of storage systems and management it can be seen that countries with higher population like China,USA,India it have become the top demanded skill in China and Singapore it is the most in demand skill rest in India and USA it is seen to have an average demand.

Mobile Development have been the most demanded skill in all countries according to the analysis when we see it on a global level then it have decreased in ireland

Statistical analysis and data mining have increased in different countries over the global average rank it can be seen that there is a decrease in ranks.With increase in data day by day there is a lot of data and with increasing data it is easy to do market analysis and identify potential customers.So in 2016 it can be seen that this skill is among top ranks in some countries like UK,Australia etc.
Data presentation cannot be seen much among the top skills in different countries just because of do and not show approach of the companies besides presentation nowadays companies work on output results for good market analysis.
SEO and SEM have been the top skills in some countries and globally as well.
